

# ENVIRONMENTAL COVERAGE *Overview*

## COVERAGE HIGHLIGHTS:

- Offered through 40+ "A" rated or better carriers
- **Environment Package Policies**
- Provides coverage for pollution claims arising from covered and completed operations
- Project specific policies available
- Each policy is tailored to fit the individual potential liability for your insured's industry
- Packages available for most risks (GL, CPL, E&O, TPL, EIL and more)
- Commercial Auto and Workers' Comp available on select risks
- Up to \$10M primary limits available
- Supported and Unsupported Excess Liability available. Can build large towers where desired or required by contract.

## ENVIRONMENTAL PACKAGE POLICIES:

- General Liability
- Contractors Pollution Liability
- Professional Liability
- Transportation Liability
- Mold Liability
- Site Pollution Liability

## WHY IT'S IMPORTANT:

Whether it is for a contract requirement or if there is an actual exposure, an environmental liability claim can be devastating. Don't let your insureds wait until it's too late.

## COVERAGE DESIGNED FOR:

### CONTRACTORS AND CONSULTANTS

We offer contractor and consultant coverage for everything from medical laboratories to coverage for hazardous disposal plants.

### PREMISES/SITE SPECIFIC

We can help with Water Treatment Facilities, Property Owners, Brownfield Redevelopment Projects, Real Estate Transactions, Manufacturers and more. Includes mitigation expenses up to full policy limit. Up to 3-year terms.

### TRANSPORTATION

Ask us about our Hazardous Materials and Hazardous Waste Haulers coverage options.

### MANUFACTURERS - PRODUCTS POLLUTION

Manufacturers and distributors of chemicals, coatings, fertilizer, fireworks, lubricants, oils, paints, soaps and many others considered.

## POTENTIAL ENVIRONMENTAL EXPOSURES:

- Chemical spill or release
- Dangerous mixtures of liquid solvent wastes from press cleaning
- Historical industrial use of property
- Improper labeling of chemicals
- Inadequate hazardous waste management
- Loading and unloading of hazardous chemicals
- Removal or abandoned underground or aboveground fuel storage tanks
- Spillage/stained soils
- Unknown, leaking underground or aboveground tanks or piping
- **And many more exposures**
